The AI Webinar Funnel System

The whole webinar funnel, from the first touch to the booked call, in six stages. Each stage has one job, one thing to build and one number to watch. AI drafts every piece from one brief; a person approves.

The six stages

STAGE	WHAT YOU BUILD	THE NUMBER TO WATCH
1 Traffic	Cold email, LinkedIn and calendar invites to one list	Visit rate
2 Landing	A registration page in nine blocks, the form above the fold on a laptop	Sign-up rate
3 Nurture	Reminders on every channel, timed from the session	Show-up rate
4 Conversion	The session in order: promise, problem, method and proof, invitation, Q&A	Booking rate
5 Revenue	The booking page, the call and the proposal	Close rate
6 Long-term nurture	A teaching email every week for everyone who didn't buy	Rebooking rate

THE EQUATION

`Customers = sign-ups × show-up rate × booking rate × close rate. Fix the weakest stage only.`

The reminders

WHEN	WHAT IT DOES
On sign-up	Confirms the time in their time zone and adds it to their calendar
7 days before	A small task that gets them thinking
The day before, 08:00 their time	The time, the link, what to bring
1 hour before	The link
15 minutes before	The link
At the start	"We're live" and the link

Three prompts to start

Write my registration page

```
Write the copy for my [FILL: registration / seat / video / booking / join] page, block by block:
1. Trust strip line. 2. Headline (the promise, under 12 words) and subhead (the mechanism in one line);
give 2 headline options, one benefit-led and one problem-led. 3. A 60 to 90 second video script (muted,
captioned) that makes the promise credible. 4. Three proof points as numbers, only from my proof list. 5.
Form heading and button label. 6. My method in 3 to 5 named steps, one line each. 7. Where testimonials go
and the objection each must answer. 8. An FAQ: 6 questions from my buyer's objections, answered in 2 to 3
sentences. 9. Sticky button label.
Event line: [FILL: or "evergreen"]. Use my Funnel Brief. Never invent proof: leave [FILL: proof] where I
have none.
```

Write my reminder sequence

```
Write the reminder sequence for [FILL: my event line].
Touches: 7 days before (value primer, under 200 words), 24 hours before at 08:00 their time (what to
prepare, 180 to 220 words), 1 hour before (join link, 80 to 100 words), 15 minutes before (under 50
words), and live now (50 to 70 words).
For each: email subject, preheader and body, plus a WhatsApp version under 300 characters for the 24-hour,
1-hour and live touches, written as a plain statement of fact. One link per message: {join_link}. Use
{first_name} and {event_time}.
Use my Funnel Brief. No hype, no invented numbers.
```

Write my attendee and no-show follow-ups

```
Write two follow-up sequences after my [FILL: session].
Attended: straight after (offer and {booking_link} or {checkout_link}), +1 day (recap plus this objection
answered: "[FILL: objection 1]"), +2 days (proof plus "[FILL: objection 2]"), +3 days (last call, deadline
[FILL]).
No-show: +24 hours (replay {replay_link}, closes [FILL: date]), +2 days (the one idea they missed: [FILL:
idea and minute]), +5 days (replay closes tonight), +7 days (next session [FILL: date]).
Subject, preheader and body under 150 words each, one link each, plus WhatsApp versions under 300
characters for the first message of each branch.
Use my Funnel Brief. Proof only from my proof list.
```
